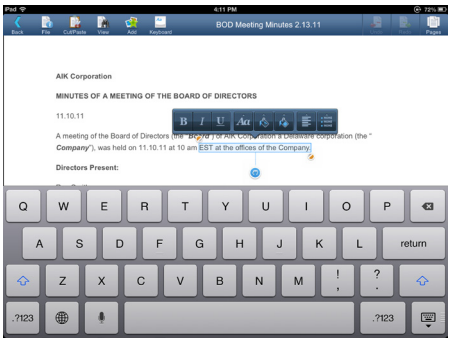
What's New in mobilEcho® 4.5?

Featuring the Embedded Office Document Editing

Acronis mobilEcho is a true business platform for the enterprise. mobilEcho enables employees to access, edit and create documents, presentations, spreadsheets, PDFs and other files that reside on enterprise file servers, NAS and SharePoint files. And mobilEcho provides the enterprise with all the security and management capabilities to securely and seamlessly integrate it into your current environment.

mobilEcho is the perfect solution for organizations that want to make corporate files available to a set of internal mobile users, typically within an Active Directory infrastructure. mobilEcho allows the corporation to secure and control access to the content while ensuring that its mobile users have all the relevant files and materials necessary to perform their jobs.

The latest features and enhancements of mobilEcho 4.5 include:



- Secure, in-app editing of Office documents, spreadsheets and presentations
- Military-grade, FIPS 140-2 certified encryption module
- Support for Office 365 hosted SharePoint sites
- New thumbnail preview view – greatly enhances navigation of files
- Support for opening multiple files simultaneously
- Support for client certificate authentication to mobilEcho servers
