

Remote Connections & Passwords. Everywhere!

# Overview

# Remote Desktop Manager

## Remote Desktop Manager lets you centralize it all

A variety of factors have converged to create the need for a robust, efficient and simplified remote connections management platform, including:

- IT departments are increasingly being asked to do more with less
- The number of servers, the size of databases and users continue to substantially increase
- IT security has emerged as a critically important organizational issue – often the most important
- Many teams are no longer co-located in the same room or even the same city, and must find better and smarter ways to work together when they're separated by time and space

Add it all up, and it's clear that in order for IT professionals and departments to achieve their objectives and stay ahead of their competition, they need a powerful, reliable and trusted business and team-based solution.

In a world where productivity, efficiency and security are top priorities and looming challenges, Remote Desktop Manager delivers a unique platform that empowers you to centralize all of your remote connections via a refreshingly simple and user-friendly interface. It's the elegantly efficient way to create a world in which remote connections are unified, security is strong and manageable, and teamwork is both easy to achieve and enjoyable to experience. That's the vision of Remote Desktop Manager, and even more, it's our unwavering promise to you!

## Powerful

### **Give the power to your IT team.**

Centralize and manage your remote connections, credentials and passwords in a one and only complete solution. Create synergy within your team by easily sharing information. Empower individual and team performance and productivity.

## Productive

### **Save time and simplify your life.**

Say goodbye to spending valuable time trying to remember or locate passwords, credentials and connection settings. Focus on tasks that add value to your organization.

## Intelligent

### **Customize to meet your specific needs.**

Enjoy the industry's most complete and easy-to-use remote connections management solution. Leverage integrated technologies to manage your connections, tools and entire IT infrastructure.

# Remote Desktop Manager Delivers Solutions

- Integrate all your connection types (RDP, VNC, FTP, VPN, Web, SSH, ARD) and many others
- Secure, organize and store your sensitive data
- Centralize your information
- Enable teamwork, share session settings & passwords
- Manage user security rights
- Monitor, verify and analyze connection logs
- Simplify user queries
- Streamline support tasks
- Save time and money

# Deployed in a matter of minutes

Have you ever wished that you could easily add, edit, organize, delete, and manage all your remote connections? With Remote Desktop Manager (RDM), you can do it all in a matter of minutes!

## Get started

Download Remote Desktop Manager Enterprise to your computer to use all of the powerful features available. The Free Edition has limited functionalities, but still can be just perfect for your needs. Follow the installation instructions and **you're ready to go**.

<https://remotedesktopmanager.com/Home/Download>

## Create Sessions

Set your connection settings, passwords and credentials. You can choose from hundreds of integrated tools and protocols, including RDP, VPN, SSH, TeamViewer, VNC, Putty, LogMeIn, Apple Remote Desktop and many others.

## Start working

You're now ready to easily add, edit, organize, delete, and manage all your remote connections! You can control different servers, machines or any other device with a single click, and rapidly switch between sessions.

I'm very impressed with Remote Desktop Manager. It's a tried and tested, true enterprise team solution. It's easy to deploy, simple to use, and extremely feature-rich. Truly a must-have tool for all IT Pros in today's world.

**Douglas A. Brown**

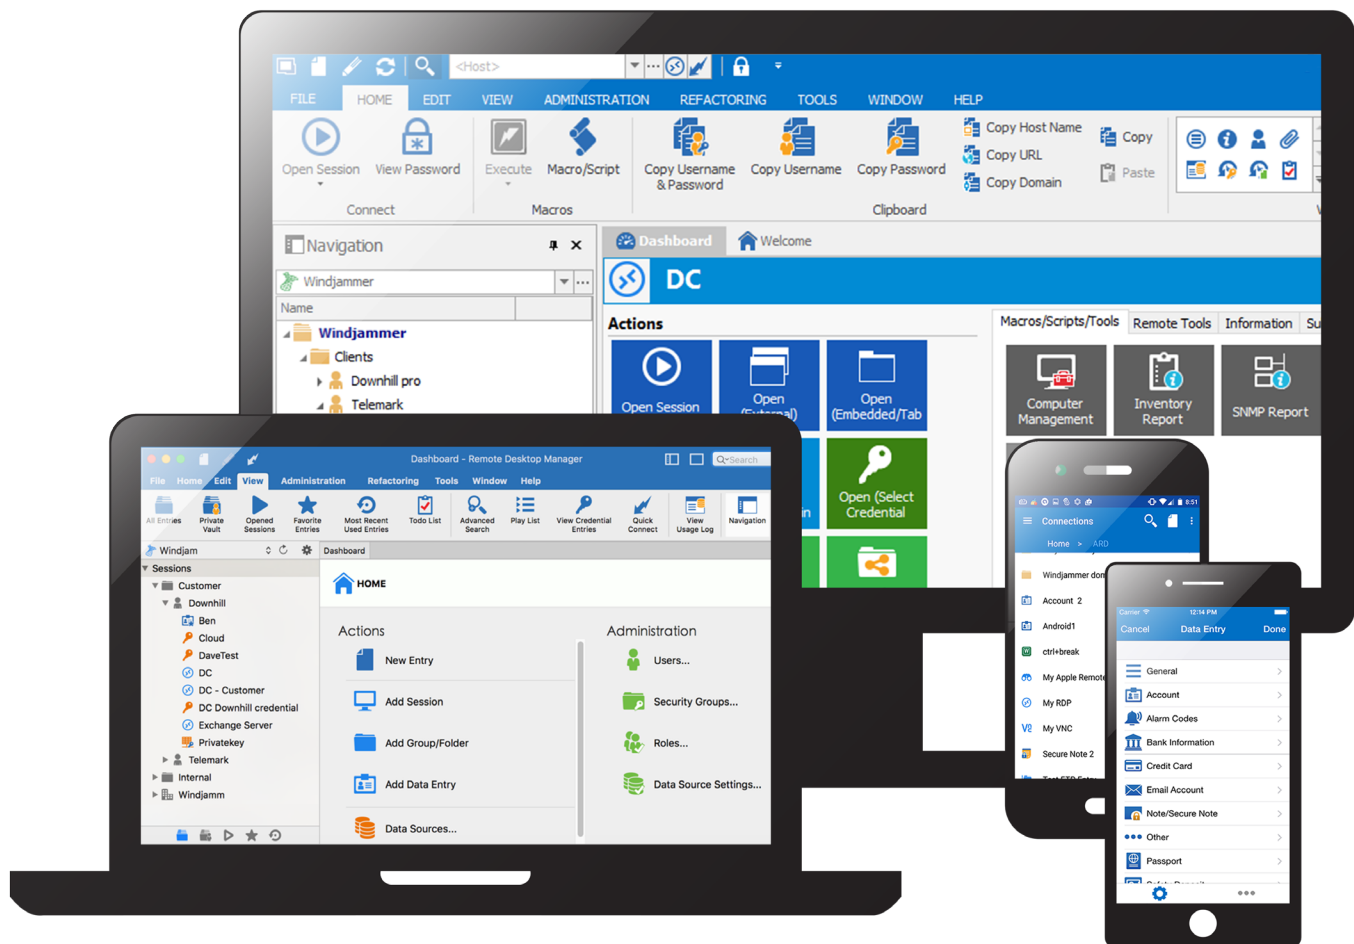

Founder of DABCC.com - Microsoft MVP, Citrix CTP, VMware vEXPERT

Remote Desktop Manager has everything a support technician needs to manage remote desktop connections to a wide variety of different systems. It's more efficient than managing spreadsheets or text files to keep track of all.

**Russel Smith**

WindowsITpro.com

Cross-platform    iOS

Remote Desktop Manager is one of the most feature-rich remote management tools I know. Aside from helping you organize your Remote Desktop connections, it supports a plethora of protocols and even allows you to administer virtualization solutions and cloud environments.

# Integrate and Support Multiple Connection Types

## RDM is fully integrated with dozens of leading technologies

We're proud to say that RDM features the largest integrated technology roster in the industry. It's all part of our vision to offer you a versatile, all-in-one solution that completely achieves all of your remote desktop connection management needs today, and tomorrow.

**Count on us to create the add-on you need.  
No extra fees, no worries.**

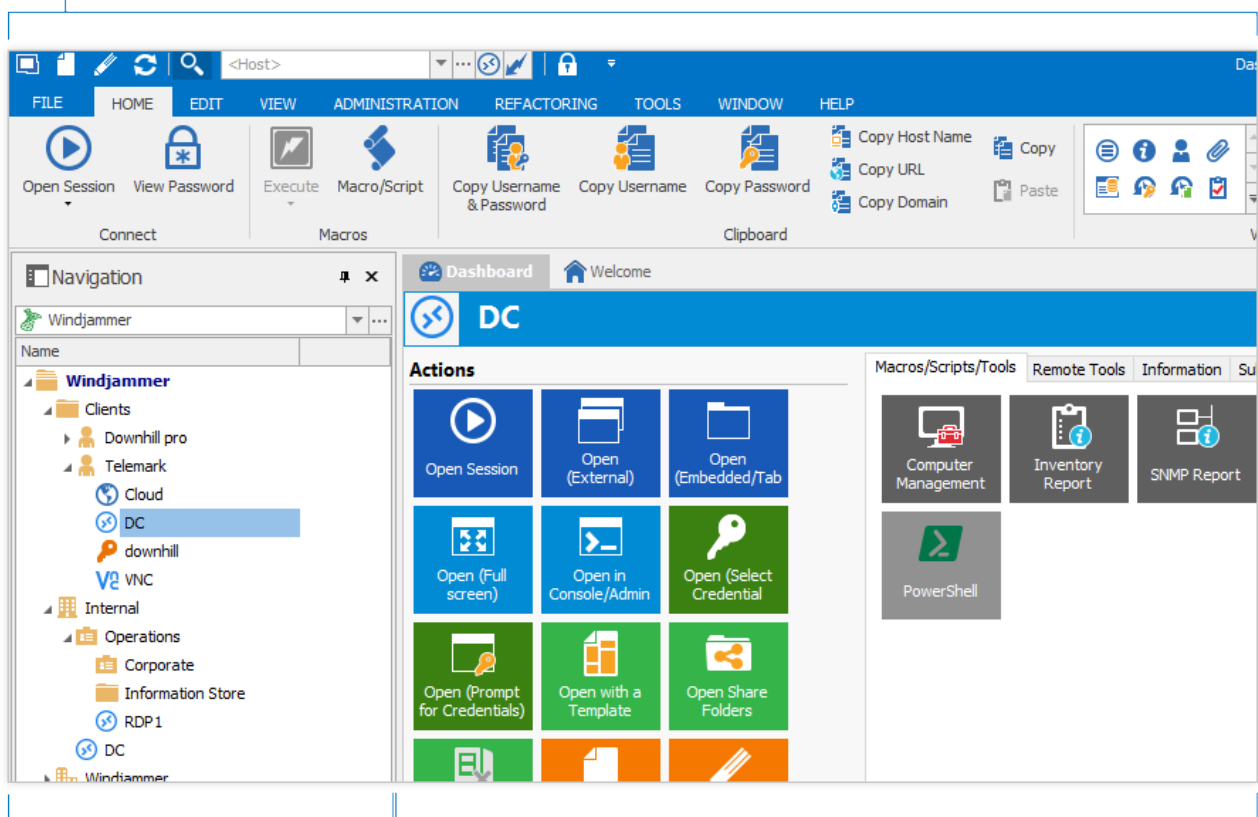

Remote Desktop Manager supports more than 60 free add-ons and plugins, and the list grows every week. Our development team works day-in and day-out responding to requests from our amazing community of IT professionals.

Tell us what you need, and we'll make it happen!

# A single, easy-to-use dashboard

## Top Pane

The Top Pane is a container for Quick Access Toolbar and the Ribbon Menu. It's usefulness arises of the fact that it can be hidden to maximize the client area of the main form

## Navigation Pane

The navigation pane is the core of Remote Desktop Manager's user interface. The All Entries tab (the first one) lists all the various entries (sessions, data entries, credentials entries, etc) and is the principal manner of launching sessions.

## Content

The content area contains the various dashboards to manage RDM, as well as embedded sessions. There is a single dashboard active at a time, depending on the currently selected entry in the navigation pane.

# Licensing

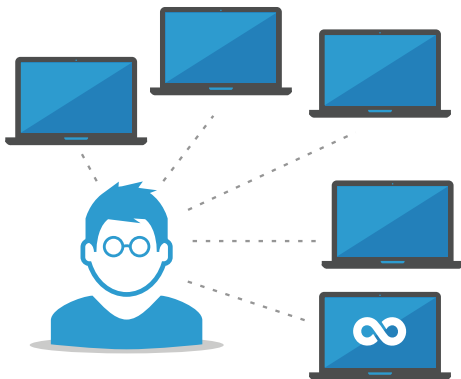

## All of the freedom you want

Remote Desktop Manager licenses are available per USER - not per machine. We've done this so that you can benefit from our product at home and in your office without paying additional licensing fees.

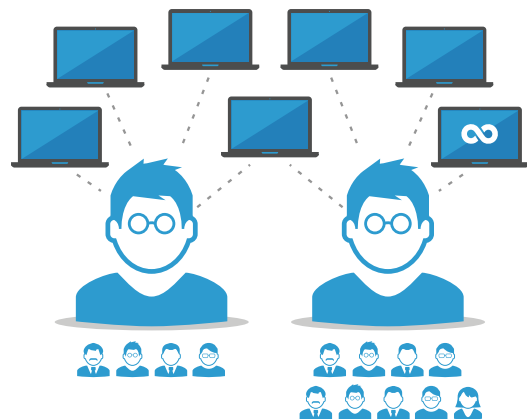

Plus, it is not a subscription-based service, and your license will never expire. You'll also receive one full year of upgrades and support at no additional cost.

After that, you can choose to pay a nominal fee and receive regular maintenance and upgrades, along with the capacity to install the latest versions.

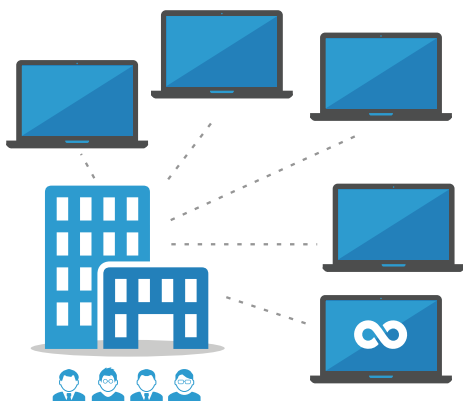

### Single User License

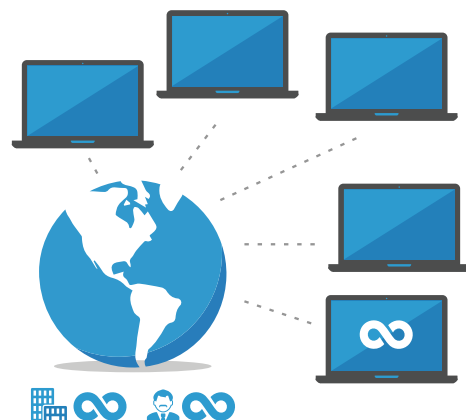

### Multiple User License

### Site License - Single Site Unlimited users

### Global License - Multiple Sites Unlimited users

# Resources & Support

We have answers when you need them! Plus, we simplify the support process by empowering you to choose the channel that's best for you:

## Support Team

Our world-class support and development team is always ready to help you! We don't just sell licenses; we create partnerships. And we don't just develop new technologies; we deliver concrete solutions. That's why our support team is always ready to answer your questions and respond to your requests.

## Forum

Our Devolutions forum is your one-stop source for remote connection knowledge, technical information, expert-to-expert conversation, and more. With over 4,500 active members from across the globe, be assured that you'll be in exactly the right place to ask your questions, request new features, or tell us about an add-on or plugin that you'd like to see. We take all requests very seriously, and pride ourselves on being responsive to our community.

## Blog

Our blog serves a global community of IT pros and other users, and focuses on both technical and non-technical topics of interest. Our blog is also a great way to learn more about us, who we are, and what we do. You'll also find information on software updates, new tools, and tips and tricks to help you get the most of RDM's many enhanced features.

## Tutorials

Explore more than a dozen video tutorials that clearly explain application key features. Learn how to set up new connections, share sessions, manage security groups, install add-ons, manage credentials, store passwords, and more. Plus, we're always adding new videos and updating existing ones to capture the latest features.

## Online help

Our online help is your 24/7 go-to resource for answers regarding various features, functions, integrated tools, protocols, and much more.
