

Macrium Reflect

MACRIUM REFLECT SERVER FAMILY

Protect your critical systems with sophisticated server backup solutions

Macrium Reflect Server helps organisations of all sizes easily back up Windows servers with fast backup times and full image, or file and folder-level restores.

For email and database backups, Macrium Reflect Server Plus for Exchange and SQL adds the capability to back up and restore Microsoft Exchange servers and Microsoft SQL Server databases at item level, enabling incremental and differential backups of new or edited data, plus item-level restores.

For companies that use virtual machines only, Macrium Reflect Virtual Machine License Bundle offers a cost-effective licensing option that provides all the capabilities of both solutions.

MACRIUM REFLECT SERVER

Rapid Delta Restore

Reduces image restore time by 90% or more

Rapid Delta Cloning

Copies only differences between source and target file systems, accelerating replication

Incremental forever backup

Faster recovery of data and reduced data growth with incremental backups

Macrium ReDeploy

Restores images to dissimilar hardware

Synthetic full backups

Synthesises data from earlier backups, reducing bandwidth for offsite replication

Physical and virtual server backup

Enables users to back up both physical and virtual servers

MACRIUM REFLECT SERVER PLUS FOR EXCHANGE AND SQL

FOR MICROSOFT EXCHANGE

Item level backup and recovery

Backs up Microsoft Exchange servers and SQL Server databases at a detailed level

Exchange granular recovery

Recovers individual mailboxes, folders, messages and more

FOR MICROSOFT SQL SERVER

SQL continuous backup

Ensures frequent backup of databases, improving recovery point objectives

Plus all the features of Macrium Reflect Server

MACRIUM REFLECT VIRTUAL MACHINE LICENSE BUNDLE

Cost-effective licensing

Simple bundle pricing for groups of five or ten virtual machines

Premium 24x7 support

Provides complete peace-of-mind

Macrium Reflect

BENEFITS

Macrium Reflect Server provides a reliable and sophisticated backup solution for enterprises of all sizes, with the capacity to back up physical and virtual servers as well as workstations. Data can be backed up quickly and easily using one of the pre-defined backup plan templates and retention strategies. This fully customisable approach allows IT professionals to choose the best approach for their enterprise. The inclusion of features such as Rapid Delta Restore greatly reduces recovery times and provides peace of mind restores.

Macrium Reflect Server Plus for Exchange and SQL also offers the capacity to back up Microsoft Exchange servers and SQL Server databases at a detailed level – eliminating the need to back up an entire database or mailbox each time, which can be expensive, inefficient and time-consuming.

For companies that run applications, Exchange or SQL Server environments exclusively on virtual machines, the Macrium Reflect Virtual Machine License Bundle provides a flexible, cost-effective licensing option.

With reliable, swift backup and recovery solutions in place, organisations can eliminate the worry of losing critical data, while minimising the impact of backup processes on day-to-day business.
