

## File compression software for Microsoft Office, JPEG and PDF files

Most Microsoft® Office, JPEG and PDF files are unnecessarily bloated – and bloated files are hard to share. Large email attachments fill up your mailbox, take ages to send and often get ‘bounced back’ without ever reaching their intended recipient.

For IT departments, it means additional storage, slower mail servers, choked bandwidth and an increasing number of IT support calls.

### NXPowerLite fixes file bloat

Used by more than a million people worldwide, NXPowerLite Desktop Edition attacks file bloat at the core, compressing PowerPoint®, Word, Excel®, JPEG and PDF files by up to 95%\*.

Incredibly simple to use, it can compress files from within Microsoft® Office, or integrate with your email client to automatically compress email attachments as they are sent.

It works by eliminating any excess baggage and converting graphics to the most efficient file format and resolution. You're left with a file that looks and feels identical to the original, but is much smaller.

Files remain in their original format, retaining all their attributes and visual content integrity. They don't need to be unzipped and there's no need for special viewing software – so they can be opened and edited by anybody.

*“Doesn't exactly compress files, it wrings them out, shaking unneeded bytes out of graphics and included objects to radically reduce their size without affecting their appearance.”*

**InformationWeek**  
THE BUSINESS VALUE OF TECHNOLOGY

### Lossy by design

File optimization is ‘lossy’ by design – trimming bloated elements is the only way to permanently reduce file sizes.

NXPowerLite removes gratuitous, excess data from your files and makes a number of additional adjustments to ensure they are no larger than they need to be.

### Visual quality of files

‘Visual content integrity’ means compressed files look identical to the originals in every way. They also retain all of their original attributes and functionality. Using NXPowerLite's default settings, there is no visible difference between the original and optimized version of a file. The optimized version is just much smaller.

### What's new in NXPowerLite 5?

NXPowerLite can now remove file bloat and redundant data from PDF files, compressing them by an average of 30-50%. It also features higher quality default settings, can compress JPEG files without resizing them and is fully compatible with Microsoft® Office 2010.

### Choice of compression levels

You can optimize for screen, print, mobile devices or select your own custom settings. Whichever you choose, you'll find that NXPowerLite is far more effective than ZIP compression on image-heavy files.

### Batch processing

You can compress multiple files in one sitting – simply drag them onto the NXPowerLite window to build a list of files.

If you add a folder or standard ZIP archive to the list, NXPowerLite will search through it and compress any PowerPoint, Word, Excel, JPEG or PDF files it finds.

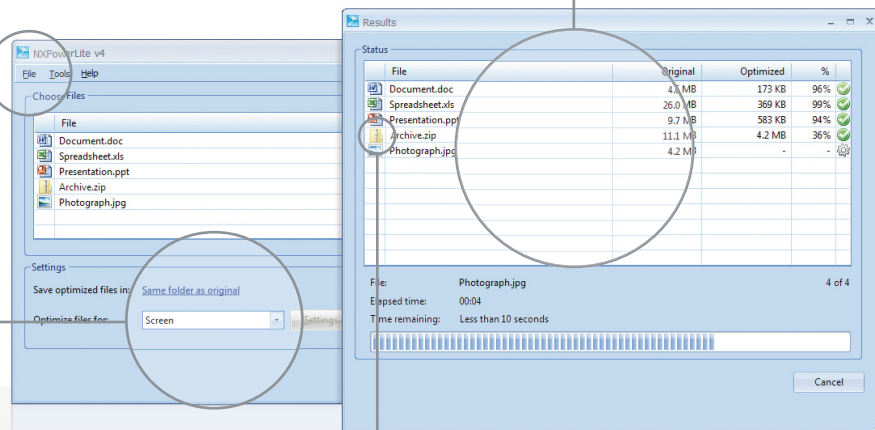

### Email add-in

NXPowerLite integrates with your email client to automatically compress email attachments.

### Simple user interface

NXPowerLite is fast, effective and incredibly easy to use.

The simple user interface feels instantly familiar and you'll be compressing your files within seconds.

### Microsoft® Office integration

NXPowerLite is fully integrated with Microsoft® Office, so you can compress files from within PowerPoint®, Word or Excel®. You can also compress a file by right-clicking it in Windows® Explorer.

### ZIP archive optimization

You can even compress files with they're stored within ZIP archives.

NXPowerLite will look inside your .zip files and compress any PowerPoint®, Word, Excel®, JPEG or PDF files.

*“NXPowerLite has been thoroughly tested under the most rigorous of operational circumstances and was never once found wanting.”*

### System requirements

Compatible with PCs running Microsoft® Windows® 2000 or later. Microsoft® Office integration requires Office 2002-2010\*. Email integration requires Lotus® Notes® (6.0-8.5), Microsoft® Outlook® (2002-2010\*), Outlook® Express (6) or Windows® Mail (6\*).

NXPowerLite Desktop Edition 5 can compress Microsoft® PowerPoint®, Word and Excel® files (Office 97-2010), JPEG images and PDF documents. It can also compress standard ZIP archives containing any of these file types.

### NXPowerLite for File Servers & NXPowerLite for Small Business File Servers

Automatically replace the PowerPoint®, Word, Excel® and JPEG files on your servers with smaller, optimized versions.

The Desktop and File Server editions of NXPowerLite can be combined to create a powerful, tailored solution that maximizes your return on investment.
